

SATAKE

Roll Change Trolley For SRM & SRMD Rollermill

The Satake Roll Change Trolley makes changing roll packs on the SRM Rollermill and SRMD Two High Rollermill quick and easy.

The machine is solidly constructed and capable of handling both 1,000 and 1,250mm rolls.

The lifting platform can be raised and lowered using either the built-in hydraulic hand pump and/or electrically using the onboard power pack connected to a 110V or 240V power source.

The trolley features parking brake, directional castor locks and can be maneuvered by one person. Contoured heavy-duty nylon locators allow the roll pack to be lifted and maneuvered safely. The trolley's sliding head permits accurate final adjustment.

Model	Lift Height	Length	Width	Height	Weight	Supply*	Roll Length
420/S	1,500mm	950mm	950mm	2,054mm	500 Kg	110/240V 50Hz	1,000 - 1,250mm

* Can be operated by hand using built-in pump without any electrical supply

All Satake products are the subject of continuous development and, as a result, their specification may change and differ in detail from that outlined in this leaflet.
